A one-day workshop was organized by the Department of Computer Science Engineering on **07-02-2026** on the topic **"Hands-on AI Tools and Machine Learning Techniques for Future Engineers."**

The workshop aimed to provide students with practical exposure to emerging AI tools and modern machine learning techniques that are essential for future engineers. The session was highly interactive and focused on real-world applications of artificial intelligence.

The workshop was conducted by distinguished speakers:

- **Dr. Brajo Kishore Mishra**, Professor and Head, Department of Computer Science Engineering, NIST University
- **N. Toyaad Kumar Reddy**, Assistant Professor, Department of Computer Science Engineering, NIST University

During the session, the speakers explained various AI tools, machine learning concepts, and their practical implementation. Students actively participated in hands-on activities using laptops, which enhanced their understanding of the subject. The workshop also covered current trends, applications, and career opportunities in the field of AI and machine learning.

The event concluded with a vote of thanks and the felicitation of the guest speakers in recognition of their valuable contribution.
